Conversation Point: Another School of Thought, provides a system for generating meaningful conversations that turn small talk into BIG talk.

These highly interactive mini-workshops

- Provide just-in-time learning
- Encourage connection
- Generate enjoyment
- Serve as powerful marketing tools

Our system puts **interested guests** together with **qualified experts** in a **small, intimate setting** that encourages a meaningful exchange of ideas.

Conversation Point's format is simple, easy, and inexpensive, **encouraging participation by diverse community members**. Scheduled conversations take place in a living room setting, around a conference table, or in a classroom.

Value is exchanged when diverse people share ideas, feelings, and experiences in a **spirit of respect, trust, curiosity, and caring**.

Humans were built for conversation – we are the talking animals. Our **history of meaningful conversation** through

the eons – from nightly tribal gatherings around the campfire to political and spiritual discussions in local taverns and around the kitchen table - **has been lost in recent years**. Our strong urge to speak and be heard, to listen and to understand remains alive.

At Conversation Point, **we provide a simple means to fulfill that deep need**.

We're now calling our Business and Money department **FĪQ U.** (pronounced *fike u*), also known as

Financial Intelligence Quotient University.

Our idea is that we all need to raise our financial intelligence so we can live our dream.

Conversations at FĪQ U. are organized around Robert Kiyosaki's four quadrants:

E mployee	B usiness owner
S elf-employed	I nvester

Each quadrant describes our major source of revenue at each stage of our financial development. We provide opportunities to help you learn the skills you need at each stage, and the ones you'll need to move on to the next stage.

We also offer what we call **Core Conversations**, which speak to financial intelligence in all four quadrants.

In addition, our FĪQ U. conversation leaders tend to be successful professionals who offer coaching and consulting, products and services. We discourage selling during conversations. However, we encourage experts to share the full extent of their knowledge and encourage guests to form their own conclusions about whether or not they wish to initiate further conversation with any expert.

We use **the power of games** to open conversation about financial issues, build relationships between those playing the prosperity game, and experience personal and financial growth.

From there, we provide **access to a variety of learning tools** tailored to your needs, including conversations we offer as well as outside resources.

We're also committed to providing THE missing piece: **ongoing support** as you apply what you learn. We find tons of how-to information lying about the stores and even on our own closet shelves. As has been wisely said, achieving financial goals is a team game. We help you form and support the teams you need to succeed.
